

General

How does the narrative begin in "The Luminaries" by Eleanor Catton?

To determine how the narrative begins in "The Luminaries" by Eleanor Catton, we follow these steps:

1. Locate "The Luminaries" in the list of Booker Prize winners...
2. Follow the flow of the infographic to find the category ...
3. The section "whose narrative begins..." has the category "in the ..."

Thus, the narrative begins in "The Luminaries" by Eleanor Catton in the third person.

\boxed{in the third person}

Across panels 1-12 plotting against clean accuracy, which variable appears most positively correlated with clean accuracy?

To determine which variable appears most positively correlated with clean accuracy across panels 1-12, we analyze the correlation coefficients (r) provided in each panel's title:

1. Panel (1): LGA vs. Clean accuracy, (r = 0.65) ...
12. Panel (12): Adv. sev. (|Delta x|_2^s) vs. LARA (epsilon = 1), (r = -0.34)

We compare the positive correlation coefficients: 0.65, 0.67, 0.90, 0.70, 0.51, 0.46. The highest value is 0.90, which corresponds to LRA in Panel (4).

\boxed{\text{LRA}}

What is the wrong answer 2?

To determine the wrong answer 2, we look at the section labeled "Wrong Answer 2" in the image. The text there is "on".

\boxed{on}

Which of the following options best matches the image? Here's some options: Sesame Street, Pochacco, My Melody, Albert Einstein. Directly output the results without any additional explanation.

Pochacco

从图中提取: 来样日期, Add, NO., 样品来源, 样品名称, E-mail, 检验类别, 样品款号, 受检单位名称, Fax, 签发报告, Tel, 并按json格式返回

How many Person are there in the image? To ensure accuracy, first detect their points using json format, then give the total number. Please represent the coordinates as normalized pixel coordinates from 0 to 1.

[{"point": [0.491, 0.255], "label": "Person"}, {"point": [0.024, 0.875], "label": "Person"}]
