

Question As shown in the figure, given that points A, B, and C are on $\odot O$, $\angle AOB = 100^\circ$, then the degree of $\angle ACB$ is ()

- Options**
- (A) 50°
 - (B) 80°
 - (C) 100°
 - (D) 200°

Answer Since angle $AOB = 100^\circ$, therefore angle $ACB = \frac{1}{2}\text{angle } AOB = 50^\circ$.
Therefore, the answer is A.
